Summary : Product-minded Engineering Leader with 10+ years bridging business management and hands-on system building. Experienced in taking products from zero to production, optimizing marketplace transaction velocity, and ruthlessly cutting operational bloat. Bias for fast shipping, async-first collaboration, and high ownership.

KEY SHIPPED PLATFORMS & ARCHITECTURE

TaamaPass — Cross-Border Digital Transit Platform — Major Transport Operator

Architected and shipped an end-to-end cloud & PWA ticketing solution across 4 countries. Replaced hours-long ticket counter queues with instant QR code ticketing, WhatsApp confirmations, and automated seat allocation.

Sòrò Stock — Autonomous Offline Inventory & Cash Engine — OHADA Compliant

Designed resilient offline desktop software with cryptographic licensing and multi-warehouse sync, enabling merchants to achieve zero-variance cash reconciliation without constant internet.
